

# Animal Report (Leopard)

5D (1) Chan Ka Yan, Katy

## Introduction

Leopards are mammals. They are the third largest land mammals.

## Appearance

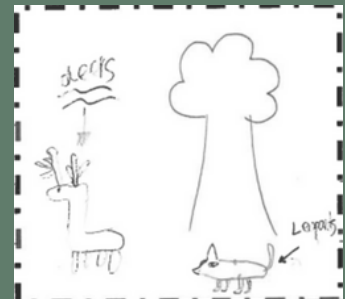

Leopards have fur, teeth and tails. Their length is 2 metres. Their weight is 21-75 kg. They also have sharp teeth because they need to eat meat.

## Habitat

Leopards live in Asia and Africa. They spend most of their time in trees.

## Diet

Leopards are carnivore. They eat large animals like cows, pigs and deers. Leopards often eat food in trees to keep away from other animals.

## Behaviour

Leopards hunt at night. They rest during the day. They growl when they are angry.

## Intersting Facts

Leopard comes from the Greek words leon (lion) and paradus (panther).

## Summary

Leopards are endangered. If people continue to do so, they will become extinct.
