

# Animal Report (Leopard)

5D (13) Lin Sze Wang, Ken

## Introduction

Leopards are mammals. They are the third largest land mammals.

## Appearance

Leopards have teeth, tails and fur. Their length is 200 cm. Their weight is 21-75 kg. They also have sharp teeth because they need to eat meat.

## Habitat

Leopards live in Africa and Asia. They spend most of their time in trees.

## Diet

Leopards are carnivores. They eat large animals. Leopards often eat food in trees to keep away from other animals.

## Behaviour

Leopards hunt at night. They rest during the day. They growl when they are angry.

## Intersting Facts

Leopards like to live alone.

## Summary

Leopards are endangered. If people continue to do so, they will become extinct.
